# About Company

Google Ads (Used to be Google AdWords) is Google's advertising solution and program for businesses to advertise on its many products and wider search network.

No matter what audience and web or mobile traffic you want to monetize, we are ready to meet your expectations for outstanding balance between revenue and experience for your users.

Our publishers monetize 100% of their traffic right now. We have a massive number of advertisers in every country, so no impressions are being wasted.

# Conti..

Online ads have become a daily part of internet life. For new marketers, it can be confusing getting a grasp on the scope and We've compiled a thorough list to help categorize and explain each form of online ads present on the web. Enjoy!

Google search ads are online ads that appear alongside the search engine result page when users search a keyword query on Google. These ads are PPC, or pay-per-click ads, in which advertisers pay for each ad click. Google's PPC search ads are managed through the Google Ads advertising platform, which allows advertisers to bid on keywords, craft ad text, set budgets, and more.

## Bing Ads

Microsoft Ads (formerly known as Bing Ads) are similar to Google ads in that they work on a pay-per-click basis. Advertisers can manage their ads through the Microsoft Ads platform. You can get started with creating Microsoft Ads once you have a Microsoft Ads Account.

## Facebook Ads

Marketplace ads appear in the side columns of the Facebook website with a headline, copy, and an image.

Boosted Posts are Facebook ads that let advertisers pay a flat rate to promote a single organic post on their Facebook business page. The promoted post reaches more fans and friends of fans than a regular post.
